

### Product Detail

### Wash Water Containment

The Porta-Pad portable containment pad offers a cost effective alternative to fixed wash pads. Wash your Boat or JetSki and safely contain any invasive species like Quagga, Zebra Mussels and plant life. Then easily pack it away for later use.  
 Works on concrete, sand, and/or asphalt.

#### Features:

- ◆ Heater

Quagga Mussel

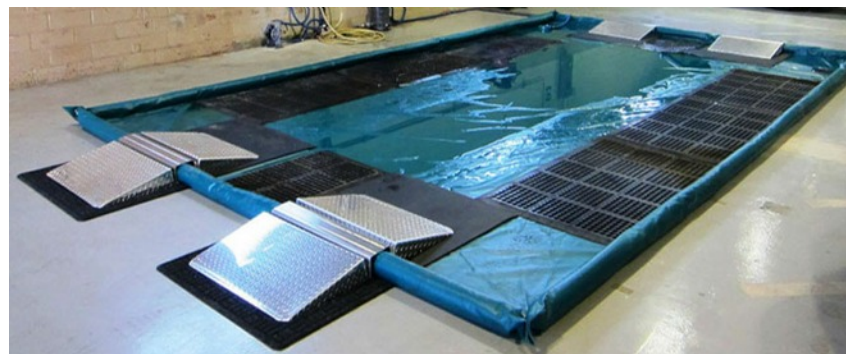

Zebra Mussel

Invasive Species examples:

- Quagga Mussel
- Zebra Mussel
- Ludwigia plant

Porta-Pad Watercraft containment system with drive-through Ramping.

12' X 22' Pull- Through Porta-Pad System Inside Garage

Invasive Species spores from boat and PWC activities can cause damage to the environment by transporting to other lakes, rivers and streams by attaching themselves to your boat or PWC. Invasive species can clog pipes, destroy engines and boat hulls and take over environments to the point that it chokes the eco-system. They are extremely difficult to remove once they have established themselves.
